Projects

Project1:- **_Education with Augmented Reality_**   (Edu-AR)   *(Group of 3)*

Basically, Augmented Reality is a Technology which is nothing but adding digital stuff to the real world. Studies shows that our brain understand visuals way faster than words/texts. However, we used AR in education domain to make learning more exciting. It turns the regular classroom into Smart ones. Our application will show 3D objects when it recognizes specific textbook images which we had already set-up for educational purpose. Edu-AR caputres & detects the image then render it and represent those images as 3D objects. It will simplify complex concepts easier.

Tools used:- Unity 3D, Vuforia Engine, Blender, Android Studio, Java.
